

Write-ups: Challenge 297 (Web Warning 4th Challenge)

Challenge page:

The screenshot shows a challenge page with a green border. At the top, it says "Hacking skill are optional". Below this is a grey box containing the text: "Want to become an APT group? No need to learn hacking" and a URL: "https://www.itgovernance.co.uk/blog/63-of-data-breaches-involve-weak-default-or-stolen-passwords". Further down, there is a "Submit flag" section. It includes a "Challenge flag" input field with the text "Flag" inside, a green "Submit »" button, a "Last user who solved this challenge kenji" label, a "View users write up for this challenge" button, a "Need help with this challenge?" label, a "Submit a write up »" button, and an orange "Buy hint »" button.

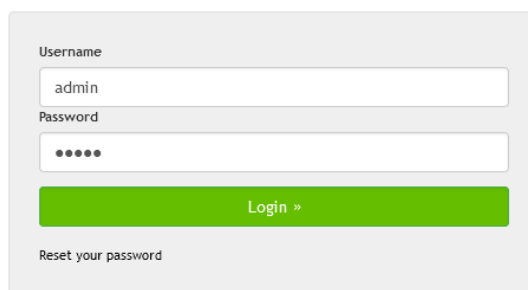

The first thing is: When I come to the article:

<https://www.itgovernance.co.uk/blog/63-of-data-breaches-involve-weak-default-or-stolen-passwords>

- ⇒ They are talking about weak password. Which is some kind of **Hint** in first place.
- ⇒ I try to find the login page, but then I realize this is an actual website of Itgovernance UK, so I pass it off and waste no more time on this page.

Come back to the thinking, I see there's no option but Ringzer0team login page to test the weak password setup:

Website Login (Do not brute force / hack this one)

The screenshot shows a login form with a grey background. It has a "Username" label and a text input field containing "admin". Below that is a "Password" label and a password input field with six dots. A green "Login »" button is positioned below the password field. At the bottom, there is a link that says "Reset your password".

After a lot of trying according to the article. I realize myself so dumb when the most default-user-password combination is: admin/admin

- ⇒ I tried it:

BOOM, I'm logged in !!!!
